FIG.3

FIG.4

**FIG. 6**

FIG. 6 is a cross-sectional view of a device 10. The device includes a substrate 15b with a cavity 19b. A layer 17b is disposed on the top surface of the substrate 15b. A layer 39b is disposed on the top surface of the substrate 15b. A layer 60b is disposed on the top surface of the substrate 15b. A layer 50b is disposed on the top surface of the substrate 15b. A layer 38b is disposed on the top surface of the substrate 15b. A layer 34b is disposed on the top surface of the substrate 15b. A layer 30b is disposed on the top surface of the substrate 15b. A layer 23b is disposed on the top surface of the substrate 15b. A layer 40b is disposed on the top surface of the substrate 15b. A layer 36b is disposed on the top surface of the substrate 15b. A dashed line indicates a cross-section through the device.

[illegible]

**FIG.8**

FIG.8 is a cross-sectional view of a device 310. The device 310 includes a main body with a central cavity 50c. A top layer 17c is positioned above the main body. A layer 15c is positioned above the main body. A layer 39c is positioned above the main body. A layer 38c is positioned above the main body. A layer 60c is positioned above the main body. A layer 30c is positioned below the main body. A layer 36c is positioned below the main body. A layer 33c is positioned on the right side of the main body. A layer 14-1 is positioned on the right side of the main body. A layer 14-2 is positioned on the right side of the main body. A layer 14-3 is positioned on the right side of the main body. A layer 14-4 is positioned on the right side of the main body. A bracket 14 groups layers 14-1, 14-2, 14-3, and 14-4.
